

# Cloud Fleet Manager from Hanseaticsoft Enables Shipping Organizations to Meet Challenges and Improve Structures on the Azure Cloud Platform

## MICROSOFT AZURE APP BUILDER PROFILE: HANSEATICSOFT

The Cloud Fleet Manager (CFM) is the heart of Hanseaticsoft's product portfolio and is one of the most intuitive and flexible solutions in the market for managing and organizing your entire fleet. We offer a variety of flexible and interdependent software solutions that enable you to significantly improve your internal structures and increase your data quality.

### WHAT WE OFFER

#### **PURCHASE**

CFM Purchase brings clarity to complex ordering processes. This module makes all information available in real time and independent from the user's location. The software leads up to a central, fully integrated ordering process that simplifies the logistics and commodity planning.

#### **DISTURBANCE REPORT**

The Disturbance Report lets you focus on handling your service requests, without the bother of email. Connect your crew on board and ashore on a single platform. Crew can create standardized service requests that contain detailed information and make plans for corrective action.

#### **INSPECTION REPORT**

Auditing ships is a complex process. With the Inspection Report, you will need less time for this process. Everything you need for auditing is provided to you on your tablet or smartphone. While auditing, you simply add photos, videos, comments, or voice notes to your report.

#### **CLOUD CREWING**

Assembling and managing crew can be an expensive and time-consuming process. To reduce the complexity, Cloud Crewing contains tools for every aspect from hiring to payroll, all clearly arranged on the easy-to-navigate Cloud Crewing dashboard with important upcoming tasks highlighted.

### WHAT OUR CUSTOMERS ARE SAYING

"Using the Cloud Fleet Manager we have been able to organize internal structures more efficiently. We're enthused about the constant development and expansion of the system." – Carsten Methe, IT Project & Application Coordinator at Peter Döhle Schifffahrts-KG

# Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

## KEY USE CASES

### WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

### CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

### BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

### MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure. Scale instantly as your install base grows.

### MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

### FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

### ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

### DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

### GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
